Special issue: Communication in People with Parkinson's Disease

ORIGINAL RESEARCH PAPERS

Surgical approaches to treatment of Parkinson's disease: Implications for speech function
Bruce E. Murdoch

Speech motor program maintenance, but not switching, is enhanced by left-hemispheric deep brain stimulation in Parkinson's disease
Harrison N. Jones, Diane L. Kendall, Michael S. Okun, Samuel S. Wu, Craig Velozo, Hubert H. Fernandez, Kristie A. Spencer & John C. Rosenbek

Self-perception of speech changes in patients with Parkinson's disease following deep brain stimulation of the subthalamic nucleus
Eleanor Frost, Elina Tripoli, Marwan i. Hariz, Tim Pring & Patricia Limousin

Sequential changes in motor speech across a levodopa cycle in advanced Parkinson's disease
Miet De Letter, John Van Borsel, Paul Boon, Marc De Bodt, Ingeborg Dhooge & Patrick Santens

Kinematic analysis of lingual function in dysarthric speakers with Parkinson's disease: An electromagnetic articulograph study
Min Ney Wong, Bruce E. Murdoch & Brooke-Mai Whelan

The effectiveness of traditional methods and altered auditory feedback in improving speech rate and intelligibility in speakers with Parkinson's disease
Anja Lotz, Corinne Dobinson, Claire Timmins, Peter Howell & Bernd Kröger

Decreased semantic competitive inhibition in Parkinson's disease: Evidence from an investigation of word search performance
Wendy L. Arnott, Helen J. Chenery, Anthony J. Angwin, Bruce E. Murdoch, Peter A. Silburn & David A. Copland

Bidirectional interference between speech and postural stability in individuals with Parkinson's disease
Christopher Dromey, Eon Jarvis, Stuart Sondrup, Shawn Nissen, K. Do Foreman & Leland E. Dibble

Talking while walking: Cognitive loading and injurious falls in Parkinson's disease
Leonard L. LaPointe, Julie A. G. Sterfwa & Charles G. Maitland
